PROJECTS

Homesteader (01/2024 - 02/2024) [🔗](#)

- "Introducing 'Homesteader': a cutting-edge web-based discussion portal empowering small farmers and agricultural students. Leveraging JSP, MySQL, Spring Boot, HTML, CSS, JavaScript, and advanced Java concepts, it offers insights on crops, fertilizers, vegetables, seeds, fruits, and climate solutions. Join the conversation and cultivate knowledge for a sustainable future".

Music Library System (10/2023 - 12/2023) [🔗](#)

- "Developed a music library system using HTML, CSS, and JavaScript, providing users a seamless platform to organize and explore their collections. Features include a user-friendly interface, advanced search, and customizable playlists".
- Implemented Add music, Change music, Playback Speed, Delete Music, Create Playlist and Create Album Functionality.

My Portfolio (08/2023 - 09/2023) [🔗](#)

- "Excited to unveil my portfolio project, showcasing my skills in HTML, CSS, JavaScript, and Bootstrap! This dynamic website offers a glimpse into my journey, featuring responsive design, interactive elements, and polished aesthetics. Explore my work and experience innovation at its finest. #Portfolio #HTML #CSS #JavaScript #Bootstrap".
